

# eca VERTICAL SIRIO SHAFT LIFT

## GENERAL INFORMATION

### ■ Platform

eca Vertical Sirio Shaft lifts are available with platform sizes ranging from 600mm x 700mm to a maximum floor area of 1.75m<sup>2</sup>. A platform size of 2500mm x 1000mm is available for travels up to 3000mm and is therefore suitable for the dignified departure of people who have passed away.

A non-slip surface of the platform ensures safe entry & exit of the lift. This surface is easy to clean allowing any water to drain off the platform. The platform can take up to 300kg (47 stone), 1 wheelchair user and 1 attendant.

### ■ Lift Configuration

Lifts can be supplied with a straight through entry/exit, adjacent entry/exit or same side entry exit configuration. For adjacent entry/exit the larger size platform is recommended on multiple floor lifts access can be made from any one of three sides at each level. See the standard layout drawings for further information.

### ■ Doors

Sirio Shaft Lifts can travel up to a maximum of 19.5 meters with up to 7 stops. The lift comes with a full height door at both the upper & lower levels. Also any intermediate stop(s) would have the full height door. The standard door is a two-panel clear glazed aluminium door and frame in an oxide black or silver anodised finish, with manual opening, and spring closing. Available in the following sizes: 2000mm x 750mm, 2000mm x 800mm, 2000mm x 850mm or 2000mm x 900mm (special sizes are available as an optional extra). eca Lifts also offer the optional extra of fire rated doors, these are available as 2000mm x 900mm and are supplied primed ready for finish paint by the customer.

# eca VERTICAL SIRIO SHAFT LIFT

## GENERAL INFORMATION

The optional extra of automatic doors is available, however this would incur an extra charge.

### ■ Lift Finishes

This Vertical Shaft Lift is aesthetically pleasing, and can be adapted to suit many surroundings. We offer several options, which would allow the lift to suit the style of the building and be as unobtrusive as possible.

### ■ Cabin

A standard lift cabin and additional side walls are available in **RAL5017 Traffic Blue**, **RAL9001 Cream** or **RAL9006 Grey**

### Sample

RAL5017 Traffic  
Blue

Non-standard colours are available as an optional extra along with our Luxury Cabin which includes additional optional colours and finishes; this cost would depend upon material chosen and quantity.

### ■ Alarm & Battery Back-up

An alarm can be activated by the user should any problem occur. While the lift is in use - if there is any problem with the power supply the battery will ensure that the lift will continue to the lower level and the user can exit the lift safely. The lift should **not** be used as a method of fire escape.

### ■ Call Controls

Lifts can be controlled from the carriage or from the call controls at the upper & lower levels. These consist of "constant pressure" controls (as per the proposed European Standard ISO 9386/1). Should a problem occur or should the passenger feel uncomfortable, the lift will stop when pressure is no longer applied.

Standard call controls are mounted onto the lift at the upper & lower levels.
